

OPEN SPACE, PARKS AND RECREATION

Background

The Village is fortunate to have a large amount of open space and undeveloped land within its boundaries. This open space serves a variety of purposes including: providing space for outdoor recreation, conserving natural and scenic resources, providing habitats for wildlife, preserving ecologically fragile areas, maintaining property values and natural beauty, and acting as a buffer between incompatible land uses. Over the past several years steps have been taken to preserve and enhance the open space within the Village. The Plan recognizes that the natural features of open, undeveloped land within the Village adds much to its distinctive character, and consequently includes goals, objectives and policies that preserve such space. For the purposes of the Plan, open space, parks, and recreation areas are defined as follows:

- ◆ **Open Space** - includes unimproved public and private open space areas designated as conservancies, farms, preserves, outlots, or buffers.
- ◆ **Parks** - includes public parks and beaches, ball fields, and playgrounds.
- ◆ **Recreation** - includes property and facilities designed for paid recreational use such as health and tennis clubs and public and private golf courses.

The Park District is charged with the maintenance of most of the park land within the Village and for providing recreation services to Village residents. The Village also enjoys large areas of open space which are privately owned. Recreation areas are both privately (i.e. The Bath and Tennis Club) and publicly (i.e. Lake Bluff Golf Course) owned and maintained.

Inventory

The open space, and parks and recreation areas found in the Village are detailed in the following tables. The tables provides a description/location for each area followed by the acreage, ownership of the area, the organization which controls the use and maintenance of the area, and the area's Plan designation. A summary table is included providing the totals for each category and the percentage per category to the total Village acreage. The map included with this section details the location of these areas.
